HTTP Crash Course

Hypex Text Transfer Protocol

By: Hitesh Choudhasy

-> What are HTTP headers

> Key-value Sent along with request & xesponse metadata —

$$\Rightarrow$$
 caching, authentication, manage state
 $X-\text{prefix} \rightarrow 2012 (X-\text{deprecated})$

- · Request Headers From Client
 · Response Headers From Server
 · Representation Headers encoding / compression
 · Payload Headers Jata
- · Payload Headers

Most common Headers

- · Accept : application / json
- · Usex Agent
- · Authorization · Content Type · Cookie
- · Cache Control

Access - Control - Allow - Origin Access-Control-Allow - Caedentials Access - Control - Allow - Method

Cross - Drigin - Embedder - Policy Cross - Origin - Opener - Policy Content - Security - Policy X-XSS - Protection

HTTP methods

Basic set of operations that can be used to interact With Server

- · GET: ketkieve a resource
- · HEAD: No message body (sesponse headers only)
 · DPTIONS: what operations are available
- · TRACE: loopback test (get same data) · DELETE: semove a jesource
- . PUT : replace a resource
- · POST : interact with resource (mostly add)
- · PATCH: Change part of a resource

HTTP Status Code • 1 xx Informational • 2 xx Success • 3 x x Redirection • 4 x x Client extox • 5 xx Server extor

60	Confinge	400	Bad reguest
102	Processing	401	Bad reguest Unauthorized
200	OK V	402	Payment required
201	Ckeated	404	Not Found
202	accepted	500	Internal Server Error
307	temporary redirect	504	Grate way time Dut
308	bes man ent se disect		V
